WC2 SERIES
Split-Core Current Transformers

WC2 Series was designed with compactness and high current ratio in mind. At 350A primary current, WC2 has the smallest footprint in the market. The pivot hinge design allows for tight tolerance during open/close metering & energy management applications and retro-fits without dismantling power-line. This CT has WC's trademark ergonomic secured Arc-Latch™ feature along with locking and servic-ing date tag provisions. Install with confidence from made in America design, quality & assembly!
